

Cement Plant to Enlarge Buildings

The new section of the local plant will cost \$1,650,000, it is estimated and will increase capacity of the plant by 3000 barrels of cement a day. A crew of about 800 men will be required for the erection of the new sector of the establishment and about a year will be required for its completion.

The plant at this city was placed in operation about twenty years ago at which time the manufacture of cement was added to the industries of Redwood City. Later two plants for the manufacture of agricultural lime and ground shell were added to the cement manufacturing equipment. All three plants have proved very satisfactory.

In a letter addressed to the stockholders of the company, the

ments of the local plant are favorable. "Disinterested engineers familiar with our industry, have stated that the three plants of your company are the most modern, well designed and efficient installations of which they have any knowledge.

The cement plant located at Redwood City has been operating for almost two years. In its first year's operation were no exceptions to the rule; we encountered many difficulties inherent in the starting of any new plant. All of these problems have been solved and the plant has been operating for almost a year in a highly satisfactory manner.

The second satisfactory operation of the plant is the manufacture, ample supply of raw materials, favorable location as to rail and deep water transportation and close proximity to large consuming markets, your directors consider it very unwise to defer increasing the capacity

**FIRE PREVENTION WEEK
TO BE OBSERVED HERE**

Firemen and citizens are busy this week in securing the cooperation of the community in the prevention of fires. This is the annual fire prevention week. The matter of fire prevention is being taken up in the schools and other organizations of the town. Fire Prevention Week is a national annual affair, and has always been a big success in this city owing to

Hurricane Devastation Scene in Miami

This photograph, transmitted over A. T. & T. wires from Miami, was taken from the water front, looking across Royal Palm park. In the center background is the Meyer Kelsor bank and office building that was badly twisted. At the right are the McAllister and Columbus hotels. The park was full of boats carried far inshore and its beautiful trees were blown down.

Airview of Miami Before the Great Storm

Airplane view of Miami, the wonder city of Florida, which was hardest hit by the hurricane that swept across the southern end of the state.

Collapse of a Long Beach Hotel

When the Hotel Brighton at Long Beach, N. Y., collapsed, a photographer was almost directly beneath it and, unmindful of the danger, he secured this masterpiece of news photography. Approximately \$100,000 damage was done to the \$1,000,000 structure, whose foundations were weakened by high seas.

Saving Iowa Levee With Green Corn

Green corn was cut from the fields and used in an effort to stop the washing away of the Skunk river levee near Burlington, Iowa. In the foreground of the photograph the corn is shown weighed down by sandbags. Farmers and convicts from the Iowa state prison at Fort Madison worked for a week on this stretch of levee.

FROM FAR AND NEAR

The United States produced 8,638 books in 1922, as against 8,329 in 1921.

A tablet to the memory of Mme. Marie Thérèse, creator of camembert cheese, has been placed on her cottage in Brittany.

Charles H. Gilbert, professor of zoology at Stanford university, has discovered that the scales of a fish show its approximate age.

Day's Coldest Period

One reason why the period just after sunrise is usually the coldest time of the day is that the earth has been giving off its heat for the maximum period since sunset; for another that, in summer and fall, the rising sun causes the evaporation of dew or fog and thus reduces the temperature.

No Pretense in Nature

Where there is much pretension, much has been borrowed; nature never pretends—Lafayette.

COATS WITH HATS TO MATCH; TIERED AND PLAID SKIRTS

Pretty Outfit for a Schoolgirl.

FOR the children there is a treat in store, namely, chinchilla coats with hats to match. Of course the mothers are going to voice their approval of this fashion, for of all cloakings none is more dependable and good looking, than is chinchilla.

The new chinchilla coats are amusingly mannish in cut and detail, until it comes to the lining, which is as joyously gay as youth could possibly wish it.

What prettier or more practical for the schoolgirl than a matching chinchilla coat and hat like the one in the picture? This particular model happens to be lined with the new suede-finished woolen fabric, but bright flannel is just as suitable. One is making a fashionable selection in either navy, or French blue lined with vivid red, or cinnamon, jungle green, channel red or garnet with a chosen contrasting lining.

There isn't much trimming needed on the hat, possibly a suede strapband and buckle or a wee cord of

not an "ea." Looks as if French stylists are tiering skirts more enthusiastically than ever, and with an ingenuity which baffles description. In fact everything that will possibly admit of the tiering process in the fashioning of the new autumn and winter costumes is being tiered, even to sleeves, as this picture so interestingly portrays.

For swaggar style the much bettered frock as shown to the left has no competer. It presents the ultra-smart idea for the coming season. Mark the clever circular treatment of the tiers which elaborate the skirt and take note of the fact that the sleeves are also tiered below the elbow. Both velvet and satin dresses are being interpreted in this tiered manner.

In fact, the velvet-tiered frock is a favorite theme among dress designers. Sometimes the tiers are placed row and row, overlapping in conventional line which simulates an appearance of wide tucks. Again, and this is a

Two Modes From Paris.

grosgrain ribbon. It, too, boasts a cheerful lining self-colored to that of the coat, but preferably of satin.

Some of the handsome chinchilla coats are enriched with nutria collars. The same is true of the plaid woolen coats for girls—they are mostly fur-collared. Likewise they have hats of same material, for the ensemble of coat and hat is being greatly emphasized in junior apparel.

Another charming outfit for the young girl for "dress up" occasions is the plaid plaited skirt either taffeta or woolen, with which is worn a velvet coat topped with a soft beret hat to match. Some of these short coats are double breasted, others are styled with novelty belts of gold or silver kid or gay suede which is artfully detailed with metal decorations.

Children's suede-cloth coats acquire skirt fullness with godets or plaits, also below-the-elbow fullness is gathered into tiny fur wristbands, matching the collar.

Tiers are popular in Paris, at least in fashion's realm, where they spell it with an "ie" and

very popular idea, each tier is scalloped. Very modish is the velvet skirt formed of scalloped tiers, the same worn with a gorgeously gay plaid blouse, or perhaps one of exotic print or metal splendor. The texture and weight of the new velvets admit gracefully of the tiered manipulation, being exceedingly supple, and one might almost say sheer, so exquisitely delicate are they to the touch—and velvet is the rage!

As to plaits, they never grow weary in well doing, and if some of us expected them to be relegated to the past, present-day fashions prove conclusively the fallacy of such a thought. While all-around plaited skirts are worn, the really smart note is to mass the plaitings to the front. However the woman of fashion is given her choice and so mademoiselle who poses to the right in this picture shows her preference for an entirely box-plaited skirt with which she wears a blouse which shows a bit of shirring at the front.

JULIA BOTTOMLEY.
(© 1925, Western Newspaper Union.)

Skirts Remain Very Brief

Rumors that skirts were to be dropped at least an inch or two apparently were without foundation. The dresses seen at the important resorts, and the models brought out for the fall seasons show skirts quite as brief as any that have been worn during the past three months.

Fur Scarfs

When a wrap is not worn a fur scarf becomes a necessity. The sil-

ver foxes again held the premiership. Aside from these, however, the number of red fox scarfs is chosen because of their nice blending with the warm tan and brown coloring.

Coat Dresses

Coat dresses of tweil are shown for fall. These are slightly bloused in the back, but have a straight front line, broken only by a belt or girle. The facings are soft-colored chiffons and crepe de chine.

Good Printing

THE kind of printing that pays dividends is the kind you should have. Pale, muddy, poorly arranged printed matter is worthless. The quality of your business is often judged by the quality of your stationery—superior printing gives an impression of business that is hard to overcome, while good printing carries with it a desirable suggestion of quality.

We produce only Quality Printing. Whether you want an inexpensive handbill or a letterhead in colors, if you order it from us you will be sure of getting good work. We have the equipment and the "know how" that enable us to get out really good printing—printing that grows people with the good rapidity of weeds. That is the kind of printing that

1-Doctor Stresemann accepting Germany's seats in the League of Nations assembly in Geneva. 2-Some of the 142 Mexican revolutionists held at San Diego for violating neutrality law, pleading not guilty. 3-Scene at a prominent corner in Miami Beach after the hurricane that devastated southern Florida.

NEWS REVIEW OF CURRENT EVENTS

Southern Florida Ravaged by Hurricane—Life and Property Losses.

By EDWARD W. PICKARD

PROBABLY five hundred men, women and children dead. More than a thousand injured, many of whom not recover. Property losses estimated at \$200,000,000. Between 100 and 75,000 persons homeless and great numbers of them rendered destitute.

In a few words summarizes the situation in southern Florida after the terrible West Indian hurricane that swept across the state from the north, moving northwest and then south, the property loss was heavy though no fatalities were reported. Miami, the "wonder city," and its beautiful suburbs were the worst sufferers, though Fort Lauderdale, Hollywood, Moore Haven and other towns were virtually ruined and scores of other places were devastated. With the wind blowing 150 miles an hour, the waters of the Atlantic ocean were even clearer over lovely Miami Beach far inland at Miami and all along the coast. Vessels of all sizes and sizes were piled upon the beaches totally wrecked, thousands of houses and other buildings of wooden construction were leveled and nearly the towering palms, Australian eucalyptus and other trees were torn up by the roots. Automobiles by the thousands were swept off the Miami causeway to Biscayne bay or piled up in heaps of junk in the streets. The buildings of steel construction in Miami resisted the hurricane in most cases and the handsome homes of many millionaires, though damaged by the invading waters, were not ruined. The palatial hotels of Miami Beach were badly shattered. Of the Miami Marine Canal Cables, where there are new wooden structures, came off best.

The Miami storm relief executive issued this appeal:

"To the American People:

"The city of Miami is compelled to make an appeal to the people of the United States for the relief of Miami and Dade county. Six days ago this city of 200,000 was one of the most prosperous beautiful and delightful communities in this country. Today, as a result of a disastrous tropical hurricane which devastated our coast last Saturday, it lies prostrate.

"We have 100 dead and nearly 1,000 injured in hospitals, hundreds of whom are grievously injured. While conditions are being rapidly restored, means of most wonderful and efficient co-operation of its citizens along important lines, the problems confronting them are almost insurmountable. Food and other necessary supplies are coming in in great quantities and we have been blessed by the arrival of a sufficient number of physicians and nurses and ample medical supplies for the immediate present. But more than 5,000 homes have been either entirely destroyed or made unfit for human habitation. Twenty thousand people have been made homeless. These are being cared for by thousands of instances by neighbors who themselves are suffering. We need money quickly and in great amounts.

"It needs it to take care of the poor, and the injured. It needs it to relocate the homes of thousands who have lost everything in the world and will die of exposure if assistance does not come promptly and abundantly upon receipt of the first disaster relief measures organized by the American Red Cross and by communities all over the country, and along every railway line to the southeast the trains are carrying physicians, nurses, supplies and food. The workers of the Red Cross are in the field, as they always are, in preventing disease that follows in the wake of storm disaster and the first steps taken after the had been organized. Workers

and persons remaining in many areas were required to submit to typhoid vaccination, and residents of Davie and Moore Haven were ordered to evacuate those towns because the water supply was polluted and an epidemic threatened. Vessels of the United States navy were put at the disposition of the Red Cross, and the destroyer Downe was rushed from Charleston to Miami with serum and the destroyer Cassin carried a load of general supplies. Under the direction of Henry M. Baker, national disaster director for the Red Cross, great numbers of refugees from the shattered towns were removed to nearby cities in trucks, special trains and automobiles.

Moore Haven, which was overwhelmed by the waters of Lake Okechobee with a loss of more than 100 lives, may never be rebuilt. But steps already have been taken for the reconstruction of Miami Beach, Hollywood and other places, while of course Miami itself purposes soon to regain its former splendor.

Damage done at Pensacola was estimated at \$3,000,000, and it was heavy at Mobile and other places on the gulf. St. Petersburg and other towns in that vicinity reported no loss of life but considerable to property. The hurricane, before reaching Florida, had killed a score or more in the Bahamas islands and done tremendous property damage, and Bimini island was ravaged.

From Buenos Aires comes the report of another hurricane that struck the town of Encarnacion, Paraguay, on the Parana river, killing about 400 persons and leveling thirty of the city's blocks.

CAPT. RENE FONCK, the French aviator, undertook to hop off for his non-stop flight from New York to Paris in the giant Sikorsky plane built for the project. Overloaded at the last moment, the machine rushed down the prepared runway at Roosevelt field on Long Island, staggered along for a short distance with two wheels collapsing, nosed into the earth and burst into flames. Fonck and Lieut. L. W. Curtin, the alternate pilot, crawled from the wreckage unhurt, but Charles Clavier, the French radio operator, and Jacob Islamoff, the Russian mechanic, were trapped in the fuselage and were burned to death. Chief steichen but unharmed, Igor Sikorsky, the Russian designer and president of the Sikorsky Manufacturing corporation, briefly announced his plans.

"Officers of the corporation," he said, "are shocked at the tragedy, but we believe the best tribute we can pay to their memory is to begin immediately the building of another plane to carry out the project for which these men gave their lives."

THE states members of the World court agreed to accept the United States' reservations for adherence to the court with the single condition that by a two-thirds majority the court powers could repudiate their acceptance of the reservations regarding advisory opinions and the right to amend statutes without the consent of the United States.

The forty states participating approved the drafting committee's protocol covering their terms on America's entry, and the joint note which will be circulated to the various signatories as the basis for framing their individual replies to the United States. The United States will be invited to take part in a conference with the court states to frame a special protocol to translate the five American reservations into the language of the court.

of allied forces of occupation and complete evacuation of the Rhineland earlier than had been intended. The first fruits of the negotiations were the departure of detachments of French troops from the occupied area, with the prospect that by the end of September about 6,000 of them would be withdrawn. This was immensely pleasing to the Germans.

GEN. GEORGE KONDIYLIS, premier-dictator of Greece, has dissolved his own party and will retire from politics because political leaders have been complaining that he was working for his own interests. He advises his friends to join other parties and announces that his government will continue to function for the time being and that parliamentary elections will be held under the proportional representation system. Dispatches from Athens say it is believed the former king of Greece is in Bucharest awaiting a possible recall to the throne.

SO SUCCESSFUL is the Red Army of Canton in its operations against the troops of the north that the British cabinet has been seriously considering abandoning its policy of the last two years and recognizing all de facto provincial governments in China, especially the Canton regime. This would mean the abandonment of the fiction of a central government in Peking. Meantime the third British destroyer flotilla has left Malta for Chinese waters to protect British interests. The Cantonese are pushing back Marshal Wu in Honan province and are attempting to make a junction with the army of Marshal Feng Yushang, now their ally. Wu's several times reported taken by the Cantonese, is still holding out though the garrison is facing starvation. All the women and children and 21 Americans were permitted to leave the city.

QUEEN MARIE of Rumania insists that she is going to leave Bucharest for a visit to the United States about October 2, and she has had her hair bobbed in preparation for the trip. The Rumanian foreign office some time ago denied the queen was going to make the journey, but it now declares it has approved of her plan. King Ferdinand, who is ill, says nothing about it for publication. Court circles are criticizing her majesty, who is past fifty, for cutting off her golden hair.

PRESIDENT COOLIDGE has given his approval to the selection of Maj. Gen. Charles P. Summerall as the next chief of staff of the army, to succeed Maj. Gen. John L. Hines in December. General Summerall entered the war as a colonel and made a brilliant record in France, where he commanded the artillery brigades and after the First division. He is considered a stern but just disciplinarian, highly respected by his subordinates for his forcefulness and his ability to get things done.

NEARLY eight thousand veterans of the Civil war gathered in Des Moines for the sixtieth annual encampment of the Grand Army of the Republic, and the members of the auxiliary organizations and members of the delegates' families swelled the number of visitors in the Iowa city to about 50,000. Much of the time was given up to entertainment and to reunions of various units.

MAJ. GEN. ROBERT LEE HOWZE, commanding officer of the Fifth corps, United States army, died in Columbus, Ohio, following an operation. He gained fame in the Indian warfare in the Northwest, for which he was given the congressional medal of honor; in the Philippine revolt, the Mexican border troubles and the World war.

Mary Browne to Play Suzanne

Mary Browne (left) and Suzanne Lenglen, the French tennis star, are expected to meet some time in October. The time and place have not yet been arranged. Miss Lenglen sailed for the United States September 21.

Peculiar Sacrifice Fly

Is Made to the Pitcher

Odd experiences happen in any baseball game both from the players' standpoint and from that of the scorer, and perhaps the most peculiar play this year was in the Idaho-Washington league recently in a game between the Price nine and that of Coeur d'Alene.

Coeur d'Alene had tied the count in the ninth and in the tenth numerous bingles, including Harry Trekkell's double, had galloped five counters over the platter. Trekkell rooted on the second sack with none down when Sam Webb came to bat.

Webb had received his orders to smack it on the nose, but the best he could do was lift a high fly to Snyder, the pitcher. Denny Walsh rushed in from third to help him. Pace dashed in from short while Leo Walsh backed him from second base. But Snyder didn't need their help and caught the pellet. Trekkell dashed for third base, beating Snyder by inches.

The scorer could do nothing but credit Webb with a sacrifice fly to the pitcher, because Trekkell was able to advance a base on the blow.

Wins Twenty Games

George Uhle, Cleveland's big right-handed hurler, was the first in eleven major league to win 20 games this season.

Abe Mitchell Watches Divots More Than Ball

Replacing divots is just as important as keeping your head down when you make a shot. Spotty fairways renege against a club and it is surprising how much damage an enthusiastic divot-digger can do. Caddies should be instructed to replace all dislodged turf, but the duty of the member or guest should never stop with the assumption that the bag teler is responsible for the condition of the divot—after the shot is played.

Abe Mitchell, probably one of the greatest players the world has ever known, has adopted a little system of his own that enables him to keep his head down—and also replace loose turf. Abe keeps his eye glued on where the ball was—and never looks up until after he steps forward and presses the earth together with his right foot.

English Tribunal Holds Unpaid Wager Not Debt

A legal decision of interest to book makers and backers of horses on the turf in England was given in General Sessions (London) recently, when the question was raised whether criminal proceedings could be taken against a man alleged to have incurred a betting credit by false pretenses. The verdict was "not guilty."

Judge Cecil Ruling said: "Betting transactions are not debt or liabilities within the meaning of the debtors' act, and there is no evidence on which the jury can find that the defendant incurred a debt or liability or obtained credit within the meaning of the section."

Sport Notes

However, it takes more than a pair of plus-fours to make a real golf player.

Joe Harper umpired 11 games in six days in the Sally league without an assistant.

Another growing organization is the Sorority of Girls Who Have Failed to Swim the Channel.

The good part of striving on and on to go around in 72 is that you'll still be going around at 72.

A tennis champion has come back after three years. As a rule they don't stay as long the second time.

Pittsburgh recalled Louis Koupal, right-hand pitcher, from the Buffalo club of the International league.

"Hi" Farrell, infielder of the Hattiesburg Cotton States league, has been purchased by the New York Yankees.

Virgil "Spud" Davis, third baseman for the Gulfport Cotton State league team, has been purchased by the New York Yankees.

The man who was ordered to cease using a caddy until he pays his ally-inn probably has joined the ranks of the Three-A's—No Justice, club.

Paul Bloss, left-hand pitcher, has been sold by the Columbus club of the Southeastern league to the Atlanta club of the Southern association.

Charley Street, Eddie Ainsmith, Val Pleinich and Muddy Ruel are the four catchers who have done practically all the receiving for Walter Johnson.

The Indianapolis baseball club sold its pitching ace, Carmen Hill, to Pittsburgh. The deal returns to the Pirates the hurler they released to Indianapolis in 1919.

The Minneapolis American Association club announces the purchase of Eddie Kenna, young catcher of the Nashville, Southern Association club, for \$10,000 cash.

The end of what is claimed to be a major league fielding record came when Max Bishop, second baseman of the Philadelphia Athletics, made the first error in 65 consecutive games.

The shortest game by time in the major leagues was 51 minutes, played by the New York National league club and the Philadelphia club. The score was 6-1. This was the first game of a double-header on September 28, 1919, played at the Polo grounds in New York City.

Lou Gehrig Is Fast

The clever fielding, hard hitting and swiftness on bases on the part of Lou Gehrig, Yankee first baseman, have had much to do with the winning of Miller Huggins' team this year.

Fanned 18, but Lost

What do you think of fanning 18 men and still losing your game? That's what happened to Fred Shaw of the Boston Unions against St. Louis in Boston on July 19, 1884. The winning run scored on a mull of a third strike, a sacrifice and a wild pitch by Shaw himself. Henry Boyle fanned 11, making 29 whiffs in the game. All of Boston's putouts were made by three men—Tim Murhane, Brown and Butler—the first two making 26 of the 27.

Folwell Is Pro Coach

Robert Folwell, former navy and Pennsylvania football coach, has been signed to coach the Philadelphia club of the new American football league, of which William H. ("Big Bill") Edwards of New York is president. This announcement was made in connection with a meeting of the supporters of the club interested in putting professional football on a substantial basis. The team has been nicknamed the "Quakers." The team is expected to make a fine showing.

Fanned 18, but Lost

What do you think of fanning 18 men and still losing your game? That's what happened to Fred Shaw of the Boston Unions against St. Louis in Boston on July 19, 1884. The winning run scored on a mull of a third strike, a sacrifice and a wild pitch by Shaw himself. Henry Boyle fanned 11, making 29 whiffs in the game. All of Boston's putouts were made by three men—Tim Murhane, Brown and Butler—the first two making 26 of the 27.

CHANNEL SWIMMER WILL BECOME PRO

Vierkoetter Wants to Finance Modern Bakery.

Ernst Vierkoetter, the German channel swimmer, plans to turn professional.

He has been flooded with offers from America and England for exhibition swims and vaudeville tours. The offers total \$100,000, but Vierkoetter says he wants only enough money to finance a modern bakery in Cologne.

"While I have not accepted any specific offer," the swimmer said, "I am sailing for New York in October after giving my father and mother a vacation. 'I do not want to have to accept charity again, as I did at Calais. English friends even gave me the train fare home.'"

Vierkoetter saved for years to finance his attempt at the channel. His first attempt, on August 24, failed when he was within sight of his goal. Discouraged, he was preparing to leave Cape Gris Nez when he suddenly decided to ask the former crown prince, Frederick William, to take him as a sporting proposition. The crown prince, Vierkoetter made known after his record-breaking swim on August 30, promptly remitted the necessary funds.

Vierkoetter arrived at his home in Cologne unrecognized, and immediately resumed his occupation as a baker. He said he planned to swim the Firth of Forth next year and then to

attempt the channel again, accompanied by his wife, who is also a strong swimmer.

Vierkoetter has only one eye. He revealed that he had destroyed the sight of the other with a darting needle in his infancy. The Vierkoetter have a baby, seven months old.

BASEBALL NOTES

Detroit purchased Rudy Kneisch, pitching ace of the Shamokin team of the New York-Pennsylvania league.

Announcement is made in New York that Babe Ruth has signed a contract for \$100,000 for 12 weeks of vaudeville.

Manager Goodbrod of Bloomington has taken on Clement Costigan, soccer paw twirler from the semi-pro ranks of Bloomington.

Jimmy House, right-hand pitcher with the Council Bluffs Athletics, a semi-pro team, has been sold to the Cleveland Indians.

The Birmingham club has announced the purchase of Pitcher Bill Evans from the Kansas City club of the American association.

Fantastic Tale—"Team A sold Pitcher B to Team C. A week later Pitcher B did not pitch against Team A and hold it to four hits."

The Cardinals called Catcher Bill Warwick back from Syracuse of the International league, when a hitch came up over the signing of Frank Snyder, obtained from the Giants at the waiver price.

Chattanooga has sold three pitchers to the Washington Americans and every one is playing in his first season in organized ball. The trio comprises Dick Coffman, Decatur Jones and Jim McEvoy.

Two pitchers, Jimmy Walkup, a left-hander, and Charley Sullivan, also a southpaw, have been purchased by Detroit from the Fort Worth club of the Texas league. Walkup, who is twenty-eight years old, has one of the best earned run records in the Class A loop, while Sullivan is not yet twenty years old and a youth of great promise.

Baseball is uncertain, and one of its mysteries is why a team that can't win one game a week in the spring often cops two in a single day toward the close of the season.

Terre Haute, Ind., has given many great pitchers to the major leagues, among them being "Three-Finger" Brown, Arthur Nehf, Charley Root of the Chicago Cubs, Emil Levern, Cleveland's promising recruit, and "Big Jim" Elliott who has been recalled by Brooklyn after a fine season with Seattle.

From School Teacher to Great Eminence

A young man who was brought up on a farm, qualified for district school teacher, then managed to save enough money to put him thru medical college.

Later, he moved to Buffalo, N. Y., and today the name of this man, Dr. R. V. Pierce, is known throughout the world. His Golden Medical

Discovery is the best known blood medicine and tonic. More than fifty million bottles have been sold. If your dealer does not sell the Discovery, in liquid or tablets, you can obtain a pkg. of the tablets by sending 65c to the Dr. Pierce Clinic, in Buffalo, N. Y. Also write for free medical advice.

CORNS

In one minute the pain is Gone!

Gets at the cause of corns

Dr. Scholl's Zino-pads work like magic, because they remove the cause—pressing or rubbing of shoes. The pain goes instantly. Amateurs putting or burning with "drops" (acid) is dangerous and doesn't stop the cause. Zino-pads are safe, sure, authentic, healing. They protect while they heal. Get a box at your druggist's or shoe dealer's—35c. For Free Sample write The Scholl Mfg. Co., Chicago

Dr. Scholl's Zino-pads

Put one on—the pain is gone

Nibbling the Bait

She (poutingly)—Don't you ever speak of love?

He (tactfully)—Er-yes. Lovely weather, isn't it?—Detroit Free Press.

A Word With the Old Folks

Elderly People Are Learning Importance of Good Elimination.

IN the later years of life there is apt to be a slowing up of the bodily functions. Good elimination, however, is just as essential to the old as to the young. Many old folks have learned the value of Doan's Pills when a stimulant diuretic to the kidneys is required. Scanty or burning passages of kidney secretions are often signs of improper kidney function. In most every community are scores of users and endorsers who acknowledge the merit of Doan's. Ask your neighbor!

Campaign on Tubercular Poultry

making the co-operation of poultry raisers in eliminating avian tuberculosis. S. J. Stansard, director of the state department of agriculture, announced plans for a state-wide campaign.

Hogs Produced in Tuberculosis Free Areas

are commanding higher prices than those not tested. The same benefits will accrue from the avian campaign, the director said, if poultry breeders will give their "heartly co-operation."

The Plan Contemplates the Official Inspection of Such Flocks as Are Accredited

if found worthy. For this inspection, a specialized knowledge of this particular disease in poultry is required. Inspection processes include autopsies where considered essential.

Hogs Produced in Tuberculosis Free Areas

are commanding higher prices than those not tested. The same benefits will accrue from the avian campaign, the director said, if poultry breeders will give their "heartly co-operation."

For Governor C. C. YOUNG
For Lieutenant Governor Buron Fitts
For U. S. Senator S. M. SHORTRIDGE
For Rep. in Congress, 8th Dist. A. M. FREE

Hold Fast to G.O.P.

The County Republican Committee at its meeting held in the courthouse last Friday night pledged itself to support and work from now on for the entire republican ticket. The committee is made of prominent men and women of the county who are determined to make a strenuous campaign for the entire ticket. C. C. Young for Governor; Samuel M. Shortridge for U. S. Senator; Buron Fitts for Lieutenant Governor and Arthur M. Free for Congress are the Republican candidates. They won in the primary election. They should have the entire support of every republican. No matter what our preferences were for candidates in the primary, the Republican Party has spoken and registered its choice of candidates, who are good men, all of them and they should be given every support. It is quite probable that all these nominees will be elected at the November election by overwhelming majorities, but this sentiment and feeling should not cause a laxity. Let the party be up and doing and take no chances for it is this lack of interest that has lost many a battle. Old timers will remember of the famous campaign of 1894 when M. M. Estee was the Republican nominee for Governor and Jim Budd was his democratic opponent. Everyone supposed that Estee would be elected overwhelmingly. The Republicans made little or no effort in the campaign. Budd got into an old buckboard and saw every voter and as a result he won by a few hundred votes. He was the last Democratic governor for California. Over confidence some times means defeat. We hope, therefore, that the Republican party of the county will do its part in rolling up a big majority for all the Republican candidates.

NOTES OF A WORLD TRAVELER

By Professor Ferdinand Schraider

SIXTH ARTICLE

Equally attractive as the Rhine with its ruins and lofty rocks of the medieval age is the Rhine with its Black Forest scenery; though it is less impressive, it has a distinct charm with its forest clad mountains, rising to a height of over 4,000 feet above sea-level. Freiburg, an old university town, is situated within the heart of this South-Western extremity of Germany, where it touches upon Switzerland and displays scenes of peculiar beauty.

From far away one can see the Freiburg Cathedral, a genial creation of Gothic art, the tower of which—with its perforated masonry—is the earliest and most perfect of its kind. The place in front of the Cathedral presents a striking appearance like the rest of the city there the new house, narrow and tall built upon a costly piece of soil, borders on the old-fashioned home, broad and comfortable. In magnificent stores are seen the manifold products of the Black Forest home industry; electric cars are encircling old-fashioned monumental fountains of Gothic design, and peasants with their peculiar native dresses looking like so many motives of a forgotten past, are marvelling with curiosity at a procession of happy students in their colorful caps and regalia or at a group of fashionably dressed foreigners, who are sight seeing while they are furnishing an object for observation with their very presence.

The streets are narrow and several imposing gates topped with formidable towers indicate the previous limit of the once fortified town, now purified in a very unique way by the river Dreisam, part of which is conducted in many rivulets like so many channels along the main streets of the city, and where we are used to expect the ill reported gutter to play in the clear and swiftly flowing water. This is a novel system of city irrigation, which has a merit of its own.

Near the big Cathedral as of old, the teamsters are gathering at certain hours of the day to convey with great heavy wagons the many boxes, stores and household utensils into the interior, where the proud Black Forest home lifts its mighty roof high above the meadows and orchards. Man, home, and native soil—for centuries they have lived in true companionship. Like pliable elements they have approached each other until they became one and formed a harmonious unit. It is no wonder that in these sub-

born looking Black Forest homes characters are found which are like so many originals. These houses, protected against storm, snow and the heat of the sun by an immense thatched or shingled low hanging roof, consist mostly of two stories and are preferably leaning with their backs against a hill-side in such a way that wagons and harvested crops can without difficulty enter the upper story by a ramp. The ground floor is mainly taken up by the domestic quarters of the occupants. In the living room, under numerous windows, strong wooden benches are inviting one to rest; a great table is not missing nor the crucifix on the wall opposite the large deeply sounding bright geraniums are almost obstructing the view into the world without. In the corner we see the mighty tile-stove, the comfort and cheer preserving friend of the long winter days, provided with benches on three sides and niches higher up, where the inevitable coffee pot is sending promising odors into the room. Here we find the old folks, with their knitting work, at their accustomed place and little pussy purring at their side.

When farming and the cultivation of the soil is not going on we find in these rooms performed the many home industries of wood carving and toy-making, carried on by whole families through generations. Long winter evenings and impassable roads have kept the rural people in seclusion and out of their endeavour to apply themselves and to be active in the famous Black Forest clocks have originated to the renown of the country. The inscription on one of the houses tells us, that in 1640 the first wooden clocks had been made here. Now this industry has also been modernized and taken on such proportions, that single factories are turning out 10,000 of these clocks every day, greatly improved over the earlier models by adding automatic calls of birds' voices or so-called sounding chimers.

The colorful dresses of peculiar style, worn by the natives of old, have been somewhat simplified in the course of time, but many of them are still in evidence, principally with the fair sex. The large stiff bow, almost two feet in width, with fringes hanging down upon the shoulders, is still a much seen ornament of the head. The light dress is matched by a dark shawl of lace; the plaits of hair are interwoven

(Continued on Page 5)

STAFFORD WORKS TO SECURE PARK FOR CITY

The proposition of securing a tract of land in Eagle Hill section for use at a future date as a city park was brought before the board of trustees Monday evening by Trustee Dan Stafford. Stafford stated that it would be possible for the city to secure a tract of 17 acres in the Eagle Hill district at what he considered a very reasonable price. It was one of the very few pieces of land now available. Trustee Stafford pointed out, and should be purchased for use, if not at present, at some future time for a park. "The time is coming," Stafford stated, "when Redwood City will have to buy land for park sites. When that time comes, the land will be much higher in price, and it will be impossible to secure so large a tract in one piece."

Stafford pointed out that the tract he had in mind adjoined the seven-acre tract held by the Redwood City School District and the home of Carl Beeger, these he thought might be sold at some future date, and the whole tract then used for park purposes. This would give Redwood City one of the best parks in the state, because of the natural beauty of the tract and its elevation and view of the bay and mountains.

The matter was discussed by the board, and met with the approval of every member of that body. The board decided to make a visit to the property later on in the week and make a personal study of the question.

STATEMENT

To My Friends of San Mateo County I wish to take this opportunity of expressing my deep appreciation to all who honored me with their support at the August Primaries. The campaign brought me many new friends and the opportunity of renewing old acquaintances. I appreciate so much the confidence expressed by you in the vote given me, and I congratulate those who worked so hard for me, for the clean campaign they conducted. We have no regrets only that we could not have reached more people.

To my friends who wish me to run on an independent ticket at the General election I will say that first of all, as I ran as a candidate for both parties, that it would be impossible for me to run again, and secondly, I am too good a republican to run against a man my party has chosen.

To my successful opponent I give my good wishes and shall always work with him at all times for the good of our county, or for anything for the development of northern California.

Again I thank you all for your friendship and your splendid vote. I am,

Sincerely yours,

ELSA S. MCGINN

LEGAL NOTICE

NOTICE OF APPLICATION FOR LETTERS OF ADMINISTRATION WITH WILL ANNEXED. In the Superior Court of the State of California, in and for the County of San Mateo. No. 3997

In the matter of MARGARETHE SCHMOLL, Deceased. A document purporting to be the last will and testament of Margarethe Schmoll, deceased, having on the 15th day of September, 1926, come into the possession of said Superior Court, and a petition for the probate thereof and for the issuance of Letters of Administration with the Will Annexed to Martha Harthe having been filed by said Martha Harthe with the Clerk of said Court, notice is hereby given that on Thursday, the 30th day of September, 1926, at ten o'clock, A. M. of said day, at the courthouse at Redwood City, San Mateo County, California, has been set as the time and place for proving the will of said Margarethe Schmoll, deceased, and for hearing the application of said Martha Harthe for the issuance of Letters of Administration with the Will Annexed, when and where any person interested may appear and contest the same.

Given under my hand and the seal of said Court this 5th day of September, 1926.

Local Mail Route To Be Extended

Word has been received from Washington by Postmaster Carl Mable informing him of the extension of rural route No. 2 of this post office, a route serving the northwestern territory contiguous to the city limits and the territory in that corner of the city, which is not sufficiently built up for the establishment of carrier routes.

The announcement outlines the following extensions of the route which will become effective on October 16:

On Brewster west of Canyon road, thence south to Foothill boulevard, thence south to Katherine, thence to Brewster thence east on Hillview, S. E. to Hillside, south to St. Francis, east to Jefferson, on Jefferson to Fulton, south on Fulton to Vera, west on Vera to Hudson, south on Hudson to Roosevelt, west on Roosevelt to Fairview, thence on Roosevelt to Sequoia, south on Sequoia to Redwood avenue, east on Redwood avenue to the El Camino Real, south on El Camino Real to Old Middlefield road, on old Middlefield road to Middlefield road giving service to the residents living beyond the present city delivery and also on 1st, 2nd, 3rd, 4th and 5th avenues. This extension will give delivery service to about 250 families who are now having to get their mail at the general delivery window at the Redwood City post office.

(CHARACTERISTICS OF THE BANK OF ITALY)

A bank that appeals to all classes

The Bank of Italy has attained much of its progress by establishing a banking service that appeals to all types of people.

Because of the widely known democratic spirit of the institution it has naturally attracted vast numbers of salaried people and others in moderate financial circumstances.

Yet, because of its unequalled service, its super-facilities and great financial strength—big corporations and important commercial houses have selected it as their depository and business ally.

Thus, the Bank of Italy is truly California's most popular bank, with a patronage in excess of 611,000 people.

NOTICE TO CREDITORS

In the Superior Court of the State of California, in and for the County of San Mateo.

In the Matter of the Estate of

M. C. A. To Organize Locally

Palo Alto

At the annual meeting of the San Mateo County Y. M. C. A. held in Burlingame Monday evening, it was unanimously voted to follow the findings of the various District Conferences and take a definite forward step this year. From the beginning of the work in San Mateo county two years ago, the work has been in the hands of a representative group of men from three districts in the county with a county committee made up of men from the district committee. The Redwood City District which takes in all the territory from Belmont south, including Woodside and North Palo Alto has D. W. Williams as its chairman. The advance steps as adopted include the following:

1. Definite division of the time of the secretaries to each community.
2. Securing local office space where the secretary may be found or messages received.
3. Appointment of a local treasurer and banking of all money received in a local bank.

In order that this may be accomplished and the growing work properly cared for the committee unanimously adopted the raising of a budget of \$10,000 over the county. The Redwood District as a local conference adopted \$2500 as its share of the county budget. It was decided to raise the budget for the year in three simultaneous campaigns beginning Monday, October 11th to cover a period of ten days. The campaigns will be headed up in Burlingame, San Mateo and Redwood City. In that time it is confidently expected to cover the needs of the year, making possible the advance steps mentioned above.

With no equipment of its own, the association has functioned in the county along three well defined lines, viz: Organized Club Work for boys and young men in 22 clubs with an enrollment of 461, playground supervision and promotion with an attendance of 9499, and community co-operation with other organizations, answering 9 calls and serving 6438 people.

The following officers were elected to head the county committee for the year: chairman, Wm. H. Eddy of Burlingame; vice chairman, D. W. Williams of Redwood City; secretary of board, George S. Chessum; chairman of finance, John D. Bromfield of Burlingame.

REALTY PURCHASE IS CONSUMMATED

With the purchase this week of the Sweeney ranch east of the Middlefield road by D. R. Stafford, one of the largest realty deals of recent years was consummated. The ranch contains 524 acres and was sold at a price considerably above half a million dollars.

The ranch is one of the best known tracts in the county. It was formerly the property of the late Myles D. Sweeney and has since the time of his death been held by his daughter, Mrs. Mary Sweeney Pesca. The property purchased by Stafford contains 524 acres and extends from the O'Day property which fronts on Chestnut street to the Flood property in Menlo Park. It is connected with Chestnut street by a right of way, and is traversed by the proposed right of way of the Bay Shore highway and by the line of the Dumbarton line of the Southern Pacific railway.

KNOW ALL MEN BY THESE PRESENTS:

That, I the undersigned, JOSEPH F. DOLAN, do hereby certify that I am transacting business in the State of California under the names of J. DOLAN WRECKING AND BUILDING SUPPLY CO., 2. DOLAN WRECKING CO., 3. DOLAN BUILDING SUPPLY CO., and 4. A. B. C. WRECKING CO.; that the principal place of business of the said DOLAN WRECKING AND BUILDING SUPPLY CO., DOLAN BUILDING SUPPLY CO., and A. B. C. WRECKING CO. is at number 6929 Mission street, COLMA, SAN MATEO COUNTY, CALIFORNIA; that I am the sole owner and proprietor of the said DOLAN WRECKING AND BUILDING SUPPLY CO., DOLAN BUILDING SUPPLY CO., DOLAN WRECKING CO., and A. B. C. WRECKING CO.; that my name in full is JOSEPH F. DOLAN and that my place of residence is at number 1738 Lake Street, San Francisco, California.

IN WITNESS WHEREOF, I have hereunto set my hand this 8th day of September, 1926.

JOSEPH F. DOLAN

STATE OF CALIFORNIA, City and County of San Francisco, ss: On this 8th day of September in the year One Thousand Nine Hundred and Twenty Six before me, LESTER BALL, a Notary Public, in and for the City, County and State aforesaid, residing therein, duly commissioned, sworn and bonded according to law, personally appeared JOSEPH F. DOLAN, known to me, to be the person described in and whose name is subscribed to the within instrument, and acknowledged to me that he executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my Official Seal at my office in the City and County of San Francisco, State of California, the day and year first above written.

LESTER BALL, Notary Public in and for the City and County of San Francisco, State of California. My Commission expires September 2, 1929. (SEAL)

Why California demands 2 more Trainloads of MAYTAG Washers

The last trainload of Maytag washers brought here created a greater demand for the washer with the life-lasting cast-aluminum tub. Every Maytag placed in a home brought demands from other women for Maytags. So we were compelled to place an order for two additional trainloads to take care of the orders that have been pouring in upon us from every part of the state.

Women want the Maytag—the washer that washes big tubfuls in 3 to 7 minutes—that does a whole washing—50 pounds of clothes (dry weight) in one short hour. They want the washer that keeps water hot for an entire washing. They want the washer with the tub that cleans itself in 30 seconds after the washing is done.

They want the washer with extension legs that raise or lower the washer to suit their height to bring ease and comfort to washday. They want the washer with the low-set wringer that instantly adjusts itself to a handkerchief or a blanket, and wrings both dry. They want the washer that has so many exclusive, better features that makes washday so much easier and shorter.

phone—

It costs you nothing—obligates you in no way to try a Maytag in your own home. Do a week's washing FREE. Then you will know for sure that Maytag performance is not approached by any other washer. Then you will be convinced of the immeasurable helpfulness of the Maytag on washday. Remember, there is no expense nor obligation of any kind. If the Maytag doesn't sell itself, don't keep it. Phone the Maytag dealer now!

The Girl in the Mirror

By
ELIZABETH JORDAN
(© By The Century Company.)
WNU Service

STORY FROM THE START

Laurie Devon, successful playwright, but somewhat inclined to wildness, attends the wedding of his sister, Barbara, to whom he has been left the great Devon fortune. Laurie had been a gay young chap, but for the last year he has been losing the mark, through the efforts of Barbara. Laurie, who is wealthy, refuses to settle down to work, announcing his intention of resting and seeking adventure. From his window in New York he observes the reflection of a beautiful girl in a mirror in the residence opposite.

CHAPTER II—Continued

As they looked, she suddenly stirred and moved backward, as if occultly warned of their survey. They saw her close the window, and drawing a chair close to it, sit down and stare out through the pane, still with that latent, impersonal expression. Bangs strolled back to the dressing case and resumed his interrupted toilet. Laurie, fumbling vaguely with his brushes, kept his eyes on the girl in the mirror. "She's a wonder. Prettiest girl I've ever seen," he reflected aloud. Bangs thought.

"She's probably a peroxide," he said. "Even if she isn't, she can't hold a candle to your sister." "Oh, Barbara—" Laurie considered the question of Barbara's beauty as if it were new to him. "She is good-looking," he handsomely conceded. "But there's something about this girl that's unusual. Perhaps it's her expression. She doesn't look happy." Bangs sighed with ostentation. "If you want to study some one that isn't happy, look at me," he invited warmly. "If that play of mine isn't out of me pretty soon, I'll have to have an operation."

Laurie made no reply to this pathetic prediction, and Bangs sadly shook his head and concluded his toilet, meditating gloomily the while on the unpleasant idiosyncrasies of every one he knew. To see Devon turn suddenly into a loafer upset all his theories as well as his plans.

Laurie, for some reason, dawdled more than usual that morning. It was after eleven before he went to breakfast. An hour earlier Bangs departed alone for their pet restaurant.

The girl in the mirror remained at her window for a long time, and Laurie watched her in growing fascination. It was not until she rose and disappeared that he felt moved to consider so sordid a question as that of food.

He joined Bangs just as that youth was finishing his breakfast at eight. Even under his soothing influence, he was in the mood of combined exasperation and depression with which his friends were becoming familiar.

"We had begun work as soon as we got back to town after your sister's wedding," he told Laurie, "we'd have had two acts ready by now, in the rough."

"No reason why you shouldn't have four acts ready, so far as I can see," murmured Laurie, cheerfully attacking his grape fruit. "All you've got to do is to write 'em."

Bangs lips set. "Not till I've talked 'em over with you and got your ideas," he declared, positively. "If you'd just let me give you an outline—"

Laurie set down his cup. "Do I get my breakfast in peace, or don't I?" he demanded, coldly. "You do, confound you!"

Bangs bit off the end of a fresh cigar and smoked it in stolid silence. He was a person of one idea. If he couldn't talk about the play, he couldn't talk at all. He meditated, considering his characters, his situations, his partner's and his own position, in a mental jumble that had lately become habitual and which was seriously affecting his nerves. Laurie, as he ate, chatted cheerfully and at random, apparently avoiding with care any subject that might interest his partner. Bangs rose abruptly.

"Well, I'm off," he said. "See you at dinner time, I suppose."

But Laurie, it appeared, had engagements. He was taking a party of friends out to Golden Pines that evening, in his new car, and they might decide to stay there for a day or two. Also, though he did not confide this fact to Bangs, he had an engagement for the afternoon, at a place where the card rooms were quiet and elegant and the stakes high.

The attraction of these diversions filled his mind. He quite forgot the girl in the mirror, and it was no thought of her that drew him back to New York that night. The plans of his guests had changed, that was all. The change, brought him home at eleven o'clock.

He fell asleep with surprising ease, and immediately, as it seemed, he saw the girl in the mirror. She was walking toward him, through what appeared to be a heavy fog. Her hands were outstretched to him, and he hurried to meet her; but even as he did so the fog closed down and he lost her, though he seemed to hear her voice, calling him from somewhere far away.

He awoke late in the morning with every detail of the dream vivid in his mind, so vivid, indeed, that when he approached the mirror after his morning plunge, it seemed almost a continuation of the dream to find the girl there.

He stopped short with a chuckle. The curtains of his French window were drawn apart, and in the mirror he saw the reflection of the girl as she stood in profile near her own uncurtained window and slowly dressed her hair.

It was wonderful hair, much more wonderful than than up. Laurie stared with pleasure at the red-gold mass that fell down over the girl's white garment. Then, with a little shock, he realized that the white garment was a night-dress. It was evident that the girl thought herself safe

from observation and was quietly making her toilet for the morning. "Well, she should be safe. With a quick jerk, Laurie drew together the heavy curtains that hung at the sides of the long window. Then, smiling a little, he slowly dressed. His thoughts dwelt on the girl. It was odd that she should be literally projected into his life in that unusual fashion. He had never had any such experience before, nor had he heard of one just like it. It was unique and pleasant. It was especially pleasant to have her so young and so charming to look at. He wished he knew her name and something more about her. His thoughts were full of her.

Before he left the room he parted the curtains again to open the window wide, following his usual program. As he did so he glanced into his mirror. He saw her open window, but it was lifeless. Only his own disappointed face confronted him.

CHAPTER III

Laurie Meets Miss Mayo
Laurie thought much that day about the girl in the mirror, and he was again home at eleven that night, to the wonder of Mr. Bangs, who freely expressed his surprise.

"Something pleasant been coming your way?" he tactfully asked. Laurie evaded the question, but he felt that something definitely pleasant had come his way. This something was a new interest, and he had needed a new interest very much. He hoped he would dream of the girl that night, but as he and Bangs unwisely consumed a Welsh rabbit before they went to bed, he dreamed instead of something highly unpleasant, and was glad to be awakened by the clear sunlight of a brilliant January day.

After breakfast he strolled across the square into the somber hall of the studio building on its southwest corner. The hall was empty, but he found and rang a bell at the entrance of a dingy elevator shaft. The elevator descended without haste. When it had reached the floor, the colored youth in charge of it inhospitably filled its doorway and regarded the visitor with indifference. "This young man was easy to look at, but he was no one he knew."

Laurie handed him a dollar and the youth's expression changed, first to one of surprise, then to the tolerance of a man who is wise and is willing to share his wisdom. The visitor went at once to the point of his visit.

"A young lady lives here," he began. "She is very pretty, and she has reddish hair and brown eyes. She has a studio in one of the upper floors, at the front of the house. What's her name?"

The boy's face showed that he had instantly recognized the description, but he pondered dramatically. "Dat young lady?" he then said. "In twenty-nine, on de top flo'. She jes' moved in here las' Tuesday."

"Where does she come from, and what does she do?" "The boy hesitated. What did all this mean? And was he giving up too much for a dollar? Laurie grinned at him understandingly.

"I don't know her," he admitted, "and I don't expect to. I'd like to know something about her—that's all."

The youth nodded. He had the air of accepting an apology. "I reckon she come fun some fun'n place. But I dunno what she do," he reluctantly admitted. "Mebbe she ain't doin' nothin' yit. She's home mos' de time. She don't go out hardly 'tall. Seems like she don't know many folks."

"One thing got me guessin'," he muttered doubtfully. "Dat young lady, she don't seem 't eat nothin'!"

"What do you mean?" Laurie stared at him. The boy shuffled his feet. He was on uncertain ground.

"Why, jes' what I said," he muttered, defensively. "Folkses here either eats in or dey eats out. Ef dey eats in, dey has stuff sent in—rolls an' eggs an' milk an' stuff like dat. Ef dey eats out, dey goes out, reg'lar to meals. But Miss Mayo she don't seem to eat in or out. Nothin' comes in, an' she don't go out 'nough to eat reg'lar. I bin studyin' 'bout it consider'ble," he ended; and he looked unmistakably relieved, as if he had passed on to another a burden that was too heavy to carry alone.

Laurie hesitated. The situation was presenting a new angle and a wholly unexpected one. It began to look as if he had come on a sentimental errand and had stumbled on a tragedy.

There was a chance that the boy might be all wrong in his inferences, although this chance, Laurie mentally admitted, was slight. He knew the shrewdness of this youth's type, the precocious knowledge of human nature that often accompanies such training and environment as he had had. Probably he suspected even more than he had revealed. Something must be done.

Laurie drew a bill from his pocket. "How soon can you leave the elevator?" he asked.

"Bout one o'clock," "All right. Now, here's what I want you to do. Take this money, go over to the Clarence restaurant, and buy a good lunch for that lady. Get some hot chicken or chops, buttered rolls, vegetables, and a bottle of milk. Have it packed nicely in a box. Have them put in some fresh eggs and extra rolls and butter for her breakfast. Deliver the box at her door as if it came from some one outside. Do that and keep the change. Understand?"

"Yaah, sah!" The boy's eyes and teeth were shining. "All right. Go to it. I'll drop in later this afternoon for your report."

Laurie turned and walked away. Even yet the experience did not seem real. It was probably all based on some foolish notion of the youth's; and yet he dared not assume that it was a foolish notion. He had the dramatist's distaste for drama anywhere except in its legitimate place, on the stage; but he admitted that sometimes it did occur in life. This might be one of those rare occasions.

"The girl in the mirror acts—and speaks."

(TO BE CONTINUED.)

Whatever it was, it haunted him. He lunched with Bangs that day, and was so silent that Bangs was moved to comment. "If you were any one else," he remarked, "I'd almost think you were thinking!" Laurie disclaimed the charge, but his abstraction did not lift. By this time his imagination was hard at work. He pictured the girl in the mirror as stretched on her virginal cot in the final exhaustion of starvation; and the successful effort to keep away from the studio building (his four o'clock call for all his will power. Suppose the boy blundered, or wasn't in time. Suppose the girl really had not eaten anything since last Tuesday! These thoughts, and similar ones, obsessed him.

At four he strolled into the studio hall, wearing what he hoped was a detached and casual air. When the elevator appeared, he entered it with the others who were waiting. He looked aloofly past the elevator boy as he did so, and that young person showed himself equal to the situation by presenting to this newcomer the stolid ebony profile. But when the lift had reached the top floor and discharged its passengers, the two conspirators lent themselves to the drama of their roles.

"Well?" asked Laurie eagerly. "Did you get it?"

"Yaah, sah."

"What happened?" The boy stopped his descending car midway between two floors. He had no intention of having his scene spoiled. He bulged visibly under the news he had to impart. "I got de stuff you said, and I lef' it at dat young lady's do'," he began impressively.

"When I looked de nex' time, it was gone."

"Good! She had taken it in," Laurie drew a breath of relief. "No, sah. Dat ain't all." The boy's tone dripped evil tidings. "She bring it back to me."

"What?" His passenger was staring at him in concern. "Yaah, sah. De bell rung fun her flo', and when I got up de young lady was standin' dere wid dat basket in her hand."

He paused to give Laurie the effect of the tableau, and saw by his visitor's expression that he had got it fully. "Yes? Go on!"

"She look at me mighty sharp. She got brown eyes dat look right 'toss you," he interpolated briskly. "Den she say, 'Sam, who done lef' dat basket at my do'?' I say, 'I done it, miss. It was lef' in de hall, an' de ca'd got yo' name on it. Ain't you order it?'

"No," she say, 'dis yere basket ain't fo' me. Take it, an' ef you can't find out who belong to it, eat dis yere lunch yo' self.' He paused. "I at it," he ended, solemnly.

Laurie's lips twitched under conflicting emotions, but he closed the interview with a fair imitation of indifference. "Oh, well," he said carelessly, "you must have been mistaken about the whole thing. Evidently Miss Mayo, if that's her name, wasn't as hungry as you were."

The boy nodded and started the car on its downward journey. As his passenger got off on the ground floor, he gave him a new thought to carry away with him.

"She'd bin cryin', dough," he muttered. "Her eyes was all red."

Laurie stopped and regarded him resentfully.

"Confound you!" he said, "what did you tell me that for? I can't do anything about it."

The boy agreed, hurriedly. "No, sah," he assured him. "You can't. I can't, neither. None of us can't," he added as an afterthought.

Laurie slowly walked away. His thoughts scurried around and around, like squirrels in a cage. The return of the basket, of course, might mean either of two conditions—that the girl was too proud to accept help, or that she was really in need of it. Laurie had met a few art students. He knew that hungry, not almost any one of them would cheerfully have taken in that basket and consumed its contents. He had built on that knowledge in providing it. If the girl had taken it in, the fact would have proved nothing. Her refusal to touch it was suspicious. It swung the weight of evidence toward the elevator boy's starvation theory.

Laurie's thoughts returned to that imaginative youth. He saw him consuming the girl's luncheon, and new suspicion crossed his mind. Perhaps the whole business was a bit of graft. But his intelligence rejected that suggestion. If this had been the explanation, the boy would not have concluded the episode so briskly. He had got the strange young man where he might have "kept him going" for days and made a good income in the process. As it was, there seemed nothing more to do. And yet, he thought, how the deuce could one let the thing drop like that? If the girl was really in straits—

Thus the subconscious argument went on and on. It worried Laurie. He was not used to such violent mental exercise. He dined alone that night and it was well he did so. His lack of appetite would certainly have attracted the attention of Bangs or any other fellow diner, and Bangs would as certainly have commented upon it.

The next morning he deliberately kept away from the mirror until he was fully dressed, but he dressed with a feeling of tenseness and urgency he would have found it difficult to explain. He only knew that today he meant to do something definite, something that would settle once for all the question that filled his mind. But what could he do? That little point was still unsettled. Knock at the girl's door, pretend that it was a blunder, and trust to inspiration to discover in the brief encounter if any feeling was wrong? Or put money in an envelope and push it under her door? If he did that, she would probably give the money to Sam, as she had given him the food.

The good cells can be combined in a homemade wooden box fitted with a strap handle, and the cells connected together properly to make up a useful radio battery.

If the old auto battery is a 12-volt unit, as on some cars, three of the best cells can be lifted out and combined into a good 6-volt battery. Although the cells are smaller than found in the ordinary 6-volt auto battery, for radio service the small cells can easily supply the needed amount of current up to perhaps two amperes.

Sweden Widens Radio Use
An extensive system of radio beacons and submarine signaling devices that would cover the entire Swedish coast is being planned, according to advices to the Department of Commerce. The chain of stations would greatly decrease the danger from fogs in waters on the Swedish coasts.

Use Long-Wave Lengths
Long radio wave lengths are sometimes used in Europe. Of the 137 European radio broadcast stations, 25 operate at wave lengths over 600 meters and 100 at less.

RADIO

Copyright Radio Broadcast 1926

A Two-Tube Short-Wave Receiver.

Of all the receivers submitted for the judges' approval in the Radio Broadcast Magazine \$500 contest for a short-wave receiver that would not radiate, not a single one of them could meet this latter requirement.

About fifteen receivers were selected for consideration out of all those entered in the contest. Exhaustive tests conducted at 2 GY, the experimental short-wave station of Radio Broadcast, showed that all of the receivers submitted by contestants did radiate. To determine those which radiated the least, the following tests were made: At station 2 GY a standard Reinartz receiver is in use. By keying the plate circuit of this receiver, a wave was transmitted to another receiver in the office of Radio Broadcast, some 400 yards away. Later, when a microphone was placed in the ground lead of the Reinartz, speech was readily understandable at the office. The contest receivers were compared to this set. Those which radiated as badly were at once eliminated. It soon became apparent that not one of the surviving group of the contest receivers satisfied the conditions of the contest. With the permission of the judges, Boyd Phelps, Prof. L. A. Hartline, Zeh Boush, G. C. Furness, Arthur H. Lynch, Edgar H. Felix, Dr. Lawrence Dunn, Prof. J. H. Morecroft and Dr. A. Hoyt Taylor, and the designers of the receivers which came nearest to satisfying the conditions, it was decided to award \$100 to the designer of the receiver which radiated the least and which was, at the same time, sensitive. The receiver chosen for the \$100 award was designed by Frank C. Jones, operator of GACE, of Berkeley, Calif., and is shown in the schematic diagram. In this receiver radiation is practically eliminated if due care is taken in making the final balance adjustments. There is nothing startlingly new about it except that the principle of the Wheatstone bridge is incorporated.

The Condensers.
In the article in Radio Broadcast Magazine, photographs are given so that the would-be constructor may approximate the layout of the original, but, as Mr. Jones points out, most amateurs will wish to use their own ideas in this matter. The two variable condensers, C1 and C2, are of approximately 0.0002 mfd. and 0.00015 mfd. respectively. C2 should preferably be of the straight frequency-line type, and should have low minimum capacity. The balancing condenser, C3, is a midgeet condenser of about 0.00003-mfd. capacity. Once set, this latter may be left alone, and is not considered a main control.

Our next consideration concerns the coils. In the diagram, L1 is a fixed tickler coil coupled to the tuning inductance, L2, while the antenna coil, L3, which is shown with an optional tuning condenser dotted across it, is mounted as far from the other coils as possible. It is recommended that two binding posts be arranged on a strip of hard rubber so that this coil may be connected to them and yet be located outside the receiver some two feet or so away. The center-tapped coil, L2, is a space-wound one with a 3-inch diameter. For the smaller coils, No. 16 d. c. wire is used, while No. 18 d. c. is recommended for the larger ones. The tickler coils are wound on 2-inch diameter cardboard forms, these forms being removed after the coil has been made rigid with a coating of collodion. L3 consists of from 5 up to 30 turns, and may be wound in the same manner as L2. The following tables give the turn numbers for the various frequency bands:

Turns for Frequency Bands.			
Frequency Band	Turns for L1	Turns for L2	Turns for L3
17-20 (Apr.)	17,640-9394	10,340-5451	10,340-5451
20-25	10,340-5451	10,340-5451	10,340-5451
25-30	10,340-5451	10,340-5451	10,340-5451
30-35	10,340-5451	10,340-5451	10,340-5451
35-40	10,340-5451	10,340-5451	10,340-5451
40-45	10,340-5451	10,340-5451	10,340-5451
45-50	10,340-5451	10,340-5451	10,340-5451
50-55	10,340-5451	10,340-5451	10,340-5451
55-60	10,340-5451	10,340-5451	10,340-5451
60-65	10,340-5451	10,340-5451	10,340-5451
65-70	10,340-5451	10,340-5451	10,340-5451
70-75	10,340-5451	10,340-5451	10,340-5451
75-80	10,340-5451	10,340-5451	10,340-5451
80-85	10,340-5451	10,340-5451	10,340-5451
85-90	10,340-5451	10,340-5451	10,340-5451
90-95	10,340-5451	10,340-5451	10,340-5451
95-100	10,340-5451	10,340-5451	10,340-5451

By virtue of the fact that the diameter of the tickler coil is less than that of the coil it is coupled to, the former is mounted concentrically within the latter, and is held there with thick tinner.

The r. f. choke coil may be purchased or one may be wound on a 1/2-inch form, honeycomb fashion, with 50 turns of fine wire. The grid condenser should be the best obtainable, and should have a capacity of approximately 0.0001 mfd.

can simultaneously from 46 stations throughout the country.

The occasion was the annual Radio Industries banquet held in connection with the New York radio show, at which Miss Lewis was the headliner, singing through the courtesy of A. Atwater Kent.

More than 15,000,000 people heard Miss Lewis sing on this occasion, it has been estimated. Thus the little choir girl who, a few years ago, sang to the congregation in the Methodist church at Little Rock, Ark., was heard over the radio by an audience that would fill to overflowing all the churches in the country belonging to that large denomination.

Miss Lewis has had an interesting career, having started as a choir singer and then, graduating from the Folies, studied in Europe and came back to America as the recipient of as great attention as was perhaps ever given a grand opera star.

Ways of Connecting Dry Cells for Radio
There are three ways of connecting up dry cells—series, parallel and a combination of both, series-parallel. When a series connection is desired, the center contact of one dry cell is connected to the outer one of the next cell and the center of that to the outer of the next, etc. When a parallel connection is desired, the inner terminals of all cells are connected together and then the outer connections of all cells connected together. A combination of the two is in series and then the two groups connected in

parallel.

Discarded Automobile Batteries Used in Radio
There are many old auto parts which the ingenious radio experimenter finds of value for his radio needs. And they are of especial interest because so frequently they are available without cost.

Probably the storage battery is the automobile item most attractive for a prospective radio economist. A battery that is pretty well worn and which will not turn the starter over on a chilly morning usually will light radio tubes for a long time. Then very often one or two old batteries will be on hand and, by filling each cell with distilled water and placing on charge for 15 hours or so, one can test with the hydrometer and pick out three cells that are in good shape. Old batteries discarded by garages can often be resurrected in this fashion and a good cell or two found in each.

The good cells can be combined in a homemade wooden box fitted with a strap handle, and the cells connected together properly to make up a useful radio battery.

If the old auto battery is a 12-volt unit, as on some cars, three of the best cells can be lifted out and combined into a good 6-volt battery. Although the cells are smaller than found in the ordinary 6-volt auto battery, for radio service the small cells can easily supply the needed amount of current up to perhaps two amperes.

HIGHER THAN WOOLWORTH BUILDING

Year's Sales of Lydia E. Pinkham's Vegetable Compound

MRS. E. D. DAUGHERTY
1308 ORCHARD AVENUE, MUSCATINE, IOWA

The Woolworth Building in New York City, which towers 732 feet above the street, is the highest building in the United States.

If all the bottles of Lydia E. Pinkham's Vegetable Compound sold in 1925 could be placed end to end, they would make a column as high as the Woolworth Building with enough left over to extend from Lynn, Massachusetts to Cleveland, Ohio. In many little villages as in many thriving cities along the route, who are glad to tell others about Lydia

Women Drivers
Three hundred women in Paterson, N. J., who successfully completed a safety-first course for women drivers of automobiles, have organized to prevent accidents of all kinds. They were also instructed on the prevention of accidents in the home. Membership in the new organization was restricted to those who were able to pass an examination. Practical demonstrations were given in the work of all mechanical parts of an automobile.

Notch for Every Lady
J. Bruce, the official state historian of the state of California, has a mission of California, has a notch representing a mountain bagged by him since his employment.

Learning makes a man fit for himself.—Young.

There are truths which are all men, nor for all times.—Young.
